HEAVY WEAPONS

The class designed to deal with destruction greater than conventional means, they include rocket, missiles, mortars and artillery. Large and transportable they bring damage through all types of protection but suffer from high power consumption, making their usage situational but devastating given the right conditions.

- Rocket
- Missiles
- Mortars
- Artillery

LIGHT AMMUNITION

The fundamental standards of little arms ammo have not changed for over a century, but that doesn't mean innovation has halted. The industry is continuously exploring ways to advance ammo counting the utilize of new materials that progress execution, decrease cost and indeed address natural concerns.

- Standard rifle
- Metric Rifle
- Thunder
- Remington
- Remington SPC
- Match
- AAC Blackout
- Handgun
- Blank

HEAVY AMMUNITION

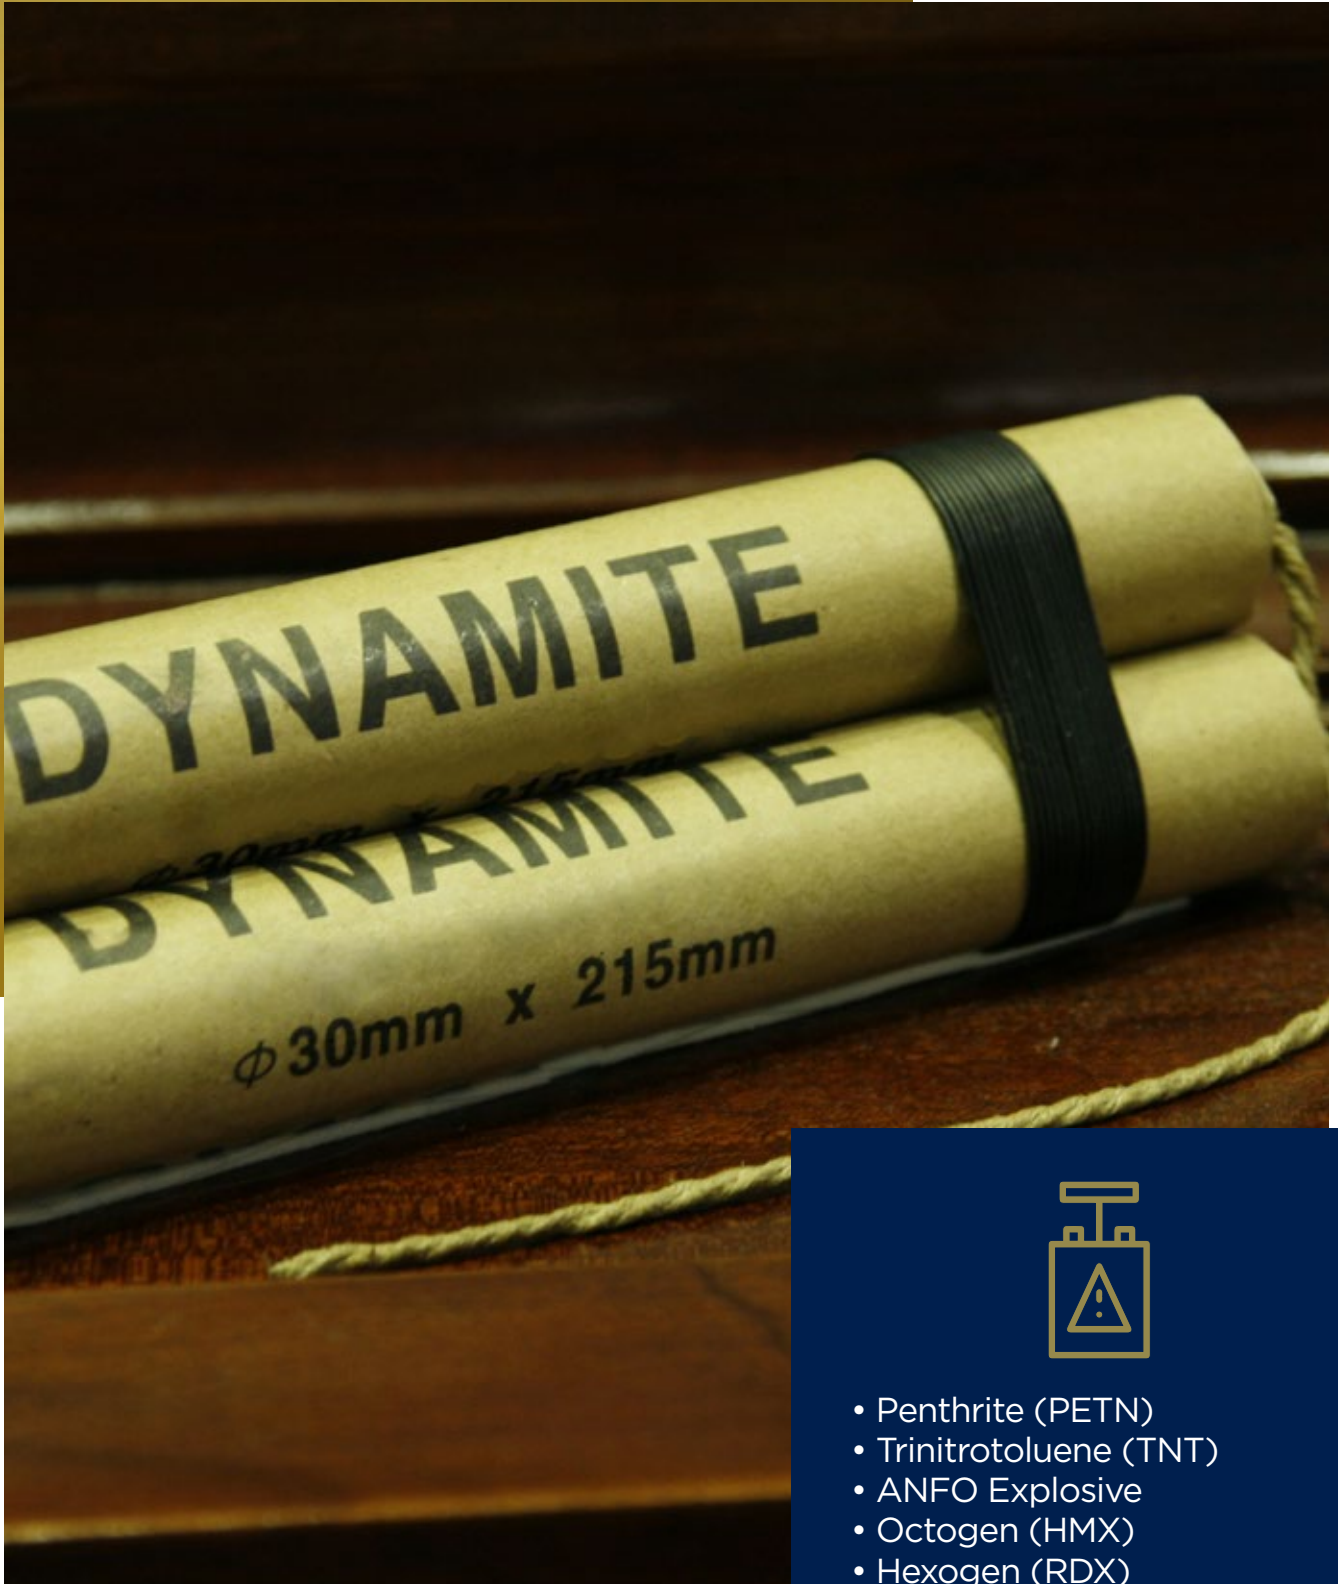

The class which was designed for a long distances and indirect (out of sight of the target) hit, extremely high-explosive and designed to shatter into fragments on impact to maximize damage. It includes main battle tank ammunition, artillery ammunition, mortar ammunition, fuzes, grenades, etc.

- Mortar Shells
- Aircraft Rocket
- Air Bombs
- Artillery shells
- Anti - tank Mines
- Hand Grenade
- Fuzes
- Anti tank guided rockets
- Anti Aircraft
